Long Night of Lymphology

Lymphology – comprehensive and interdisciplinary

Dear Ladies and Gentlemen,
Dear Colleagues,

We invite you to participate in the 6th International Lymphology Symposium – Long Night of Lymphology from November 27th till 29th, 2025.

Medicine and science are constantly changing fields and an everlasting journey, especially in lymphology.

With our mindset,

“In everything we do in lymphology, we believe in challenging the status quo; we believe in thinking differently.”

we offer you workshops and educational lectures with practical implementations of the latest scientific advances, informed by the most distinguished medical research, in cooperation with international universities and clinical partners. New perspectives and innovative ideas in lymphology will inspire this symposium.

Topics covered include complex anatomy of the lymphatic system, imaging techniques, and conservative as well as surgical treatment options for lipoedema and lymphedema. Additional topics will be vascular malformations, lymphedema in children, in the genitals and in head and neck regions. New concepts in the medical therapy of adults and children will be highlighted on the basis of our patients' individual needs.

Together, let us continue our interdisciplinary journey to explore the fascinating field of lymphology.

“Act with purpose, lead with your heart, make a positive impact on the world.”

with these words, we are looking forward to welcoming you in the heart of Europe for the “Nights of Lymphology 2025”.

Warmest regards,
Assoc.-Prof. PD Dr. med.
Chieh-Han John Tzou, MBA
